

Sage 300 ERP

(Formerly known as Sage ERP Accpac / ACCPAC)

At-a-glance version enhancements for 2014 edition

Top reasons to upgrade from previous versions

1. **Enable collaboration and interoperability** through new web technology that leverages the current superior architecture.
2. **A global synchronized release of all modules** keeps your system working together harmoniously.
3. **Improve productivity with the Sage 300 ERP Portal**, providing faster, personalized role-based access to information for accomplishing everyday tasks.
4. **Envision success with Sage 300 ERP Snapshots**, which provide secure access to key performance indicators for more proactive trend analysis.
5. **Get the information you need, faster.** Sage 300 ERP Inquiry facilitates fast access to customized lists, providing the answers you need to make better decisions.
6. **Accelerate growth and lower total cost of ownership** with Sage CRM Workflow Enhancements, which improve information flow between the front and back office.
7. **Save time on month-end processes and reduce erroneous postings** through better management of fiscal periods.
8. **Easily adopt new enhancements and get new employees up to speed faster** and cost effectively with help and usability improvements.
9. **Ensure optimal business management** with Sage CRM and Sage 300 ERP Intelligence Reporting.
10. **Adopt the visual user interface at your own pace** and ensure a smooth transition to web technology.

Top reasons to upgrade from previous versions to Sage 300 ERP 2012

1. **Simplify update processes** with Sage Advisor and Sage Advisor Update.
2. **Reduce time navigating business processes** and customize business processes to specific user roles with Sage Visual Process Flows.
3. **Improve productivity with enhancements** throughout the solution that were inspired by requests from customers just like you, such as: entered by, on hold reason, and requested by fields in Order Entry; copy order and create purchase order directly from Order Entry; reverse GL batches; and usability updates.
4. **Get the operational information you need, faster—** while lowering the cost of custom reporting. The Inquiry Tool now links to Inventory, Order Entry, and Purchase Order.
5. **Make better informed decisions** with comprehensive business intelligence utilizing the new reporting trees and financial report designer in Intelligence Reporting.
6. **Expand your customized reporting capabilities** with the updated SAP Crystal Reports® for Sage 300 ERP run-time engine and take advantage of new options in several standard reports.
7. **Accelerate growth and stay connected** with Sage CRM enhancements that improve information.

Top reasons to upgrade from Sage 300 ERP 2012 to Sage 300 ERP 2014

1. **Drive productivity with the fresh look of our modernized user interface** and more intuitive data entry screens.
2. **Maximize return on investment** with improved user license management capabilities to free up user license counts as needed for high-priority business requests.
3. **Get a consolidated profitability view of customers, products, and salespeople** using the profitability dashboard for Sage ERP Intelligence Reporting.
4. **Connect your salespersons** through an iPhone app and track sales with Windows 8 using Sage CRM.
5. **Enhance productivity by mapping your daily tasks and processes** from any application from a single screen using the enhanced Visual Process Flows.
6. **Seamless Integration** with Sage EasyPay HR and Payroll management software, bridging the gap between payroll transactions and your chart of accounts.
7. **Revolutionize processes** with dedicated Sage 300 Manufacturing modules, catering specifically to the different process needs of the manufacturing industry.
8. **Spearhead your compliance** with reporting functions for Goods and Services Tax (Singapore and Malaysia editions only)
